

Merit Badge Workbook

This workbook can help you but you still need to read the merit badge pamphlet.

This Workbook can help you organize your thoughts as you prepare to meet with your merit badge counselor. You still must satisfy your counselor that you can demonstrate each skill and have learned the information. You should use the work space provided for each requirement to keep track of which requirements have been completed, and to make notes for discussing the item with your counselor, not for providing full and complete answers. If a requirement says that you must take an action using words such as "discuss", "show", "tell", "explain", "demonstrate", "identify", etc, that is what you must do.

Merit Badge Counselors may not require the use of this or any similar workbooks.

No one may add or subtract from the official requirements found in Boy Scout Requirements (Pub. 33216 - SKU 637685).

	The requirements were last issued or revised in 2013	•	This workbook was updated in _	May 2017.
Scout's Name:			Unit:	
<u> </u>				

Counselor's Name: ____

Counselor's Phone No.: _____

Please submit errors, omissions, comments or suggestions about this <u>workbook</u> to: <u>Workbooks@USScouts.Org</u> Comments or suggestions for changes to the <u>requirements</u> for the <u>merit badge</u> should be sent to: <u>Merit.Badge@Scouting.Org</u>

- 1. Do the following:
 - a. Explain to your counselor the most likely hazards you may encounter while participating in astronomy activities, and what you should do to anticipate, help prevent, mitigate, and respond to these hazards.

Hazards:

What you should do:

Workbook © Copyright 2017 - U.S. Scouting Service Project, Inc. - All Rights Reserved Requirements © Copyright, Boy Scouts of America (Used with permission.)

This workbook may be reproduced and used locally by Scouts and Scouters for purposes consistent with the programs of the Boy Scouts of America (BSA), the World Organization of the Scout Movement (WOSM) or other Scouting and Guiding Organizations. However it may NOT be used or reproduced for electronic redistribution or for commercial or other non-Scouting purposes without the express permission of the U. S. Scouting Service Project, Inc. (USSSP).

b. Explain first aid for injuries or illnesses such as heat and cold reactions, dehydration, bites and stings, and damage to your eyes that could occur during observation.

, ,	
Heat reactions:	
Cold reactions;	
Dehydration;	
Pitos and	
stings:	
Damage to your	
eyes:	

c. Describe the proper clothing and other precautions for safely making observations at night and in cold weather.

Night:	
Cold Weather:	

Then explain how to safely observe the Sun, objects near the Sun, and the Moon.

2. Explain what light pollution is and how it and air pollution affect astronomy.

3. With the aid of diagrams (or real telescopes if available), do each of the following:

a. Explain why binoculars and telescopes are important astronomical tools.

Demonstrate or explain how these tools are used.

b. Describe the similarities and differences of several types of astronomical telescopes, including at least one that observes light beyond the visible part of the spectrum (i.e., radio, X-ray, ultraviolet, or infrared).

c. Explain the purposes of at least three instruments used with astronomical telescopes.

d. Describe the proper care and storage of telescopes and binoculars both at home and in the field.

4. Do the following:

a. Identify in the sky at least 10 constellations, at least four of which are in the zodiac.

b. Identify at least eight conspicuous stars, five of which are of magnitude I or brighter.

	Name of star	Magnitude 1 or brighter?
1.		
2.		
3.		
4.		
5.		
6.		
7.		
8.		

c. Make two sketches of the Big Dipper. In one sketch, show the Big Dipper's orientation in the early evening sky. In another sketch, show its position several hours later. In both sketches, show the North Star and the horizon. Record the date and time each sketch was made.

Date:// Time:		Date:/	_/ Time:	
•	North Star			
West	lorth			East
Suggested procedure:				
Choose a clear night when you will have time and the ability	ty to make observations some h	ours apart. L	ooking north,	draw
the position of the Big Dipper with relation to the North Sta	r. Note the time next to it. Seven	eral hours late	er (six hours al	re best th Star
and note the time next to it. (Be sure to clearly identify wh	ich diagram represents which of	oservation)		in Stai

d. Explain what we see when we look at the Milky Way.

- 5. Do the following:
 - a. List the names of the five most visible planets. Explain which ones can appear in phases similar to lunar phases and which ones cannot, and explain why.

Five Most Visible Planets	Phases?	Why?

b. Using the Internet (with your parent's permission), books, and other resources, find out when each of the five most visible planets that you identified in requirement 5a will be observable in the evening sky during the next 12 months, then compile this information in the form of a chart or table.

Planet Name			
Month			
January			
February			
March			
April			
Мау			
June			
July			
August			
September			
October			
November			
December			

c. Describe the motion of the planets across the sky.

6. Do the following:

a. Sketch the face of the Moon and indicate at least five seas and five craters. Label these landmarks.

b. Sketch the phase and the daily position of the Moon, at the same hour and place, for four days in a row. Include landmarks on the horizon such as hills, trees, and buildings.

Date: / / Time:	 Date:// Time:	
Date/1inne	Dale://IIIIIe	
East	South	West
Suggested procedure: First check to see whether it is a morning or evening	g moon and chose a time to view the mo	oon. Avoid an
observation period when there will be a new moon the moon each day. On the first day, sketch the rela	Choose a time and place you are goin ative position of the moon across the source	ig to be able to observe uthern horizon noting its
height and shape (phase). Draw some landmarks or repeat this at the same time each day for the next th	n the sketch as points of reference. On the sketch as points of reference. On the sketch and shape the height and	the same drawing, e of the moon for each
observation. <u>Note the date and time of your observa</u>	vation next to each sketch of the moon.	If the sky is overcast
observations, estimate where the moon would have	been and what shape it would have bee	n on the overcast day(s)
and indicate that what is an estimate due to overcas	st sky.	
valain tha ahangaa yay ahaanya		
xplain the changes you observe.		
xplain the changes you observe.		
explain the changes you observe.		
xplain the changes you observe.		

c. List the factors that keep the Moon in orbit around Earth.

d. With the aid of diagrams, explain the relative positions of the Sun, Earth, and the Moon at the times of lunar and solar eclipses, and at the times of new, first-quarter, full, and last-quarter phases of the Moon.

Editor's Note: These diagrams can be used to show the relative positions of the Sun, Earth, and Moon during the new, first-quarter, full, and last-quarter phases of the Moon as well as during the Waxing Gibbous", "Waning Gibbous", "Waxing Crescent", and "Waning Crescent" phases of the Moon (which is not required for the merit badge). Two of the diagrams can be used to show the positions both for a phase of the Moon and during an eclipse.

- 7. Do the following:
 - a. Describe the composition of the Sun, its relationship to other stars, and some effects of its radiation on Earth's weather and communications.

Composition:	
Relationship to other stars:	
Effects on Earth's weather:	
Effects on communications.	

b. Define sunspots and describe some of the effects they may have on solar radiation.

Definition:	
Effects:	

c. Identify at least one red star, one blue star, and one yellow star (other than the Sun).

,		· · ·	1 1	
Red star:				
Blue star:				
Yellow star:				
Explain the m	neaning of these colors.			

- 8. With your counselor's approval and guidance, do ONE of the following:
 - a. Visit a planetarium or astronomical observatory. Submit a written report, a scrapbook, or a video presentation afterward to your counselor that includes the following information:
 - 1. Activities occurring there

2. Exhibits and displays you saw

3. Telescopes and instruments being used

4. Celestial objects you observed.

b. Plan and participate in a three-hour observation session that includes using binoculars or a telescope. List the celestial objects you want to observe, and find each on a star chart or in a guidebook.

	Prepare an observing log or notebook. Show your plan, charts, and log or notebook to your counselor before making your observations. Review your log or notebook with your counselor afterward.
C.	Plan and host a star party for your Scout troop or other group such as your class at school. Use binoculars or a telescope to show and explain celestial objects to the group.
d.	Help an astronomy club in your community hold a star party that is open to the public.
e.	Personally take a series of photographs or digital images of the movement of the Moon, a planet, an asteroid or meteoroid, or a comet. In your visual display, label each image and include the date and time it was taken. Show all positions on a star chart or map. Show your display at school or at a troop meeting. Explain the changes you observed.

9. Find out about three career opportunities in astronomy.

1.	
2.	
3.	

Pick one and find out the education, training, and experience required for this profession

Discuss this with your counselor, and explain why this profession might interest you.

When working on merit badges, Scouts and Scouters should be aware of some vital information in the current edition of the *Guide to Advancement* (BSA publication 33088).Important excerpts from that publication can be downloaded from http://usscouts.org/advance/docs/GTA-Excerpts from that publication can be downloaded from http://usscouts.org/advance/docs/GTA-Excerpts from that publication can be downloaded from http://usscouts.org/advance/docs/GTA-Excerpts from that publication can be downloaded from http://usscouts.org/advance/docs/GTA-Excerpts-meritbadges.pdf.

You can download a complete copy of the Guide to Advancement from http://www.scouting.org/filestore/pdf/33088.pdf.
